

BALAJI MANOKARAN

Software Engineer — .NET / C# / React / Next.js / Full-Stack Development

Chennai, Tamil Nadu, India | +91 6379298916 | praveshbalaji144@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable web and desktop applications across .NET, C#, .NET MAUI, React, Next.js, and Node.js. Proven track record delivering full-stack solutions for healthcare, fintech, and workforce-management platforms, including AWS-integrated cloud architecture, OCR-based KYC automation, and cross-platform employee productivity tools serving 1,000+ active users. Adept at leveraging AI-assisted development workflows (Cursor, Claude) to compress delivery timelines without compromising code quality. B.Tech in Computer Science Engineering; currently pursuing M.Sc. in Computer Science from Anna University.

CORE SKILLS

- **Languages & Frameworks:** C#, .NET, .NET Core, .NET MAUI, ASP.NET, ASP.NET MVC, Java, TypeScript
- **Frontend:** React.js, Next.js 14, Angular.js, JavaScript, HTML5, CSS3, XAML, jQuery, Bootstrap, Zustand, shadcn/ui
- **Backend & APIs:** RESTful APIs, Node.js, Windows Services, Console Applications, JWT, OCR/data-parsing pipelines
- **Cloud & DevOps:** AWS (Cognito, API Gateway, Lambda, DynamoDB, S3, WAF & Shield, CloudFront, EC2, Certificate Manager), Azure, Git, CI/CD, IIS
- **Databases:** SQL Server, MySQL, HeidiSQL, DBeaver
- **Tools & Practices:** Visual Studio, Postman, Jira, Confluence, Figma, Canva, Salesforce, MVVM Architecture, AI-Accelerated Development (Cursor, Claude)

PROFESSIONAL EXPERIENCE

Associate Software Developer — Axentra Corp Limited

March 2026 – July 2026

- Engaged as Associate Software Developer, contributing C#/.NET and React/Next.js expertise to enterprise software initiatives, allocated to client Kerner Norland.
- Continued delivery on the Kyber Marketplace Phase 2 frontend engagement (Next.js 14 monorepo) through project handover, ensuring continuity of frontend architecture and sprint planning work for the business.
- Built AI-assisted sprint estimation tooling, including a 21-column AI Project Planner workbook for calibrated effort estimation across 21 epics.

Software Analyst — Agilysys Technologies India Pvt. Ltd.

April 2025 – February 2026

- Worked across the ASP.NET, MVC, and API stack on internal application modules, following established software process models.
- Developed and maintained C# background services, application trackers, and validation systems.
- Performed bug analysis, debugging, exception handling, and root cause analysis to ensure application reliability and performance.
- Built console applications, Windows Forms (EXE) applications, and contributed to multi-platform development using .NET MAUI.

Associate Software Developer — Kerner Norland

December 2023 – March 2025

- Kyber Marketplace (Next.js 14 monorepo): Set up the frontend monorepo from scratch — three Next.js 14 frontends (customer, vendor, admin) with shared packages for types, API client, UI, utils, and auth — and built a shared auth-app with role-based redirect logic.
- TEEBO TV3 (Multi-tenant SaaS, React.js): Delivered the full frontend build within a 1-month timeline using an AI-accelerated development workflow; later produced QA documentation generating 160 test cases from 32 Jira tickets and authored release notes covering 5 epics and 31 user stories.
- Workshiftly (Employee Productivity Platform): Led the .NET MAUI revamp of a cross-platform employee monitoring and task-management application — background-tracking features, geolocation, productivity analytics, and account-management modules integrated with AWS (Cognito, API Gateway, Lambda, DynamoDB, S3). Platform serves 1,000+ active users; reported to save ~5 days/month and improve productivity by ~30%.

- ▶ NorthLark Confluence: Built a responsive MVC web application enabling automated extraction of user details from government ID images via OCR, with intelligent form-filling and secure KYC validation API integrations.
- ▶ Managed development using Git, MVVM architecture, and CI/CD pipelines for scalable deployment across Windows and macOS.

Software Engineer — Enable Healthcare (EHI)

December 2022 – December 2023

- ▶ Contributed to internal and external healthcare-technology projects spanning React, .NET, C#, MVC, Angular.js, ASP.NET, and Node.js.
- ▶ Built a React-based portal (EhiFHIRPortal) and Node.js backend (EhiFHIRServer) for FHIR-compliant healthcare data interoperability.
- ▶ Developed C# console applications for claims-data processing (JSON-to-CSV conversion) and MVC-based client configuration and API request-tracking tools.
- ▶ Implemented a React-based payment portal, managed IIS deployments and JSON data pipelines, and contributed to UI/UX design in Figma.

.NET Developer — CMOTS Internet Technologies Pvt. Ltd.

April 2022 – December 2022

- ▶ Independently revamped the Chola Wealth Direct ASP.NET application, improving performance, dynamism, and user experience.
- ▶ Built ASP.NET/jQuery web applications for financial-sector clients including IFIN, GWCIndia, Muthoot Securities, and Skicapital.
- ▶ Worked across SQL Server and MySQL for data management, and HTML/CSS/jQuery/JavaScript/Bootstrap for responsive front-end delivery.

Software Developer (Intern) — Shiash Info Solutions Pvt. Ltd.

December 2021 – April 2022

- ▶ Independently developed the core logic for “Impregnable,” a project focused on maximizing cloud revenue through dynamic pricing of multi-class virtual machines, under team guidance.

KEY PROJECTS

- ▶ Workshiftly — Employee Productivity Platform: Cross-platform .NET MAUI application with screen capture, geolocation, idle detection, and AWS-backed analytics. 1,000+ active users.
- ▶ Kyber Marketplace: React.js / Next.js 14 marketplace frontend monorepo with multi-step vendor onboarding wizard and country-specific validation.
- ▶ TEEBO TV3: Multi-tenant SaaS React.js application frontend, delivered in 1 month using AI-accelerated development practices.
- ▶ Anagram (Cloud Security Platform): AWS-based WAF/CloudFront/S3 management platform with ASP.NET Web Forms UI and Stripe payment integration.
- ▶ EHI FHIR Portal: React-based portal (EhiFHIRPortal) and Node.js backend (EhiFHIRServer) for FHIR-compliant healthcare data interoperability.

EDUCATION

Master of Science, Computer Science — Anna University, Chennai (Distance Education)

2023 – Present

Bachelor of Technology, Computer Science Engineering — Dr. M.G.R. Educational and Research Institute, Chennai 2017 – 2021

CERTIFICATIONS & COURSES

- ▶ Getting Started with AI on Jetson Nano — NVIDIA
- ▶ Claude 101 — Certificate of Completion
- ▶ UI/UX for Beginners — Great Learning
- ▶ Web Development (HTML, CSS, JavaScript, jQuery, Node.js) — Udemy
- ▶ CCNA Routing & Switching: Introduction to Networks — Cisco
- ▶ Java Fundamentals — Oracle Academy
